## Fly Fishing the Madison

The Madison is a mountain range, a valley, and a county, but mainly it is a river. A river with humble beginnings in silent springs and in roaring geysers. From unnamed and seldom seen rivulets the Madison quickly grows to full strength as some of America's best known and best loved Blue Ribbon Trout waters.

The river is so accessible and fishable that without the sound and forward looking management that it has enjoyed, this national treasure would have long ago been wiped out. This painting is a salute to all of those who use, support, and protect the legacy that is the Madison.
